Dear Government

In regards to the Microsoft's antitrust case, i write you to respect me and every other individual. Microsoft is one of the noblest companies around. They create and create more. There is ZERO reasons why sucess is bad. Unfortunately, by trying to "break up Microsofts' stanglehold of the marketplace", you will break the backs of citizens like me. In a time of war, especially teenager's like me, need heroes not martyrs. Microsoft is my hero and always will be. All the other companies who cried "abuse" are not for the simple fact of this. Instead of create, the attempt to destroy. Instead of produce, they politic. This is not what we want our businesses to do. In order to have a stable marketplace, we need people to create. By putting the creators out of business, you only hurt us all. I write this in order to plea for a lesser sentence for Mircrosoft. When the government gets to big, the only way to fight it is words. In a world you attempt to create with a heavy hand over Microsoft's ability, you are making a world of looters. Ones who do it legally, ones who work in your Department. Just keep my thoughts in mind.
